Yo let me tell you this is a really good game, no kidding. Do I recommend it? YES. Why I say that? Keep reading.

A Bulletstorm game like no other, why? Is actually fun! Is like if the dev team of Metal Slug had a bulletstorm shooting division. God I am having a blast playing it. Let me tell you why I enjoy, and know I will keep enjoying this game much more. As a old school gamer let me point the following.-

- +Nicely executed Sountrack
- +Nice art (old 8bit with a touch of new technologies that makes everything move so smooth)
- +Perfect filter for "old" feeling, not too shabby
- +Beautiful backgrounds
- +Hit point on your character is actually visible (ok I wanna make a pause here to make notice on how awesome this is, the Hit point of your ship/character is actually visible, that means that you know and can see where you are gonna take actual damage and what you should protect, many fail in this and is so simply to execute, yet this game executed this one as a champ)
- +plenty of characters, and specials to pick from
- +You can't get bored at all
- ++ Dedicated to a guinea pig hero RIP space cowboy
- ++ Iconic details denotes devs dedication

-Too short?

-Story makes no sense? Can't really tell.

Tbh I wasn't paying attention because the game was a blast without any story at all. Story seems to have a funny turn tho.

Lets talk about why I missed the story at all. Do you remember the first DOOM, or the first Metal Slug? You didn't care about the story. There wasnt a tutorial telling you what is going on or any backstory either. The game started and you knew pretty much what it needs to be done, which is kick some butts. This happens in this game. If you like that kind of thing then this is your game.

The game has plenty replayability. Short but infinite to enjoy alone or with a 2P, simply aiming to a higher score every single time (as you could say of metal slug).

Getting a copy for a friend soon, I expected nothing at the beginning at the game shut my mouth in a sec. I hope theres a way to play online, yet this option seems to not be possible at the moment.. The game is a lot of fun. Definitely worth a look. The story is entertaining and the controls feel really good. And who wouldn't want to play as a snail that can stop time?

<https://www.youtube.com/watch?v=6g0GMZoj0-w>. DO NOT PURCHASE THIS GAME!!!! Seriously, save your money. HORRIBLE sound quality, extremely slow gameplay, clunky mechanics and user interface, and outright BORING compared to playing the actual card game with real friends. Just... for the love of the Gods, please do not put yourself through this torture.... Dreadful tutorial. If like me, you are aware this is a very popular boardgame, but have no idea how to play it, then you would best buy the boardgame or search for online tutorials. I really want to join the Carcassonne bandwagon, but this is probably not the best place to start.. so far very well put together roguelike, damn fun to play too.

<https://www.youtube.com/watch?v=MpfuA052kyM>. This game is a fun-filled masterpiece. Best played with friends.

It would be better if I had any. this game is so fun but i wish it had an solo mode. I have Waited for this Game Series to become Available for Mac Computers for Years, I am very happy I bought this Game. The Graphics of the game are great! The variety of Missions is very well Done and the Difficulty is just right. I would recommend this game to anyone looking for a Real time, Strategy Firefighting game for Mac and even Windows. It has a Much Different feel to the game that makes it Different from other games. Many different Vehicles and Characters to choose from. The Equipment is well done and Works great. I give this

game 5 Stars. :P. If you love the original game you will definitely love this DLC, everything it includes add fun to the original. In fact I think the price of this is much more reasonable compared to the base version.. I bought the pack and was promised x10,000 soul gems, as advertised, a big majority of what was advertised I had not received. This, is now worth the money.

Something I've realized, in game when you buy the pack you need to activate everything. It would have been smarter in my opinion if everything already came and the devs told the people where everything is. I like the game, not going to lie.

Including 4 tracks Which I find very fun to listen out of the game. Worth the price if you want to support the game creators\if you liked the music, it's good after all.. a-spifdoksdfvlvsdfdsdfsdfdsdfsdsdfs. It seems like a nice game if you like 8-bit platformers.. Its not sandbox mode if you can lose the game. Useless don't buy it. best game i ever buyy tho theres something strange when i try to screenshot 1 boss and the result is block picture. PS1 Nostalgiafest platformer. Damn thats adicting. The best part about this game is reading the reviews :D. Suck something else romainia... This game just made me hate my own country but i still bought 1 extra copy.. First there were Wolf3D & Doom, then came Quake!
